## Software License Agreement

Refer to End User License Agreement (EULA) when you install the Keystone Web Software. If required we can provide you a copy of the EULA up on request. Please call Keystone Web support at 1-800-392-5209 or email [keystone.us.support@dormakaba.com](mailto:keystone.us.support@dormakaba.com).

## Limited Warranty

BEST warrants that for a period of ninety (90) days the Software, when properly installed, will substantially conform to the functional specifications set forth in the applicable Getting Started Guide. This warranty is limited to you and is not transferable. Any implied warranties on the Software are limited to ninety (90) days. Some jurisdictions do not allow limits on the duration of an implied warranty, so this limitation may not apply to you.

BEST does not warrant that the Software will meet your requirements or that operation of the Software will be uninterrupted or error free. You assume responsibility for selecting the Software to achieve your intended results, and for use and results obtained from the Software. You must notify BEST in writing of any nonconformity associated with the Software program within 3 days of its occurrence or contact BEST's customer support team within the same period of time. The failure of Licensee to notify BEST within the time limits identified in this section may constitute Licensee's waiver to have the nonconformity corrected. This limited warranty is void if failure of the Software has resulted from accident, abuse, misapplication, or modification by someone other than BEST. Any replacement software will be warranted for the remainder of the original warranty period or thirty days, whichever is longer. If, in BEST's sole judgment, the nonconformity is considered to be a BEST responsibility, then BEST's entire liability and Licensee's exclusive remedy shall be, at BEST's option, either (a) refund of the price paid upon return of the software (including any copies) to BEST, or (b) modification or replacement of Software that does not meet this limited warranty, provided that Licensee has otherwise complied with this Agreement. BEST makes no warranties with respect to: (a) services; or (b) software which is licensed to Licensee for a limited term or licensed at no cost; all of which are provided "as is".

BEST has the right to license the Software. Any portion of the Software in which the intellectual property is owned by someone other than BEST has been licensed to BEST for sub-licensing to you and others. Such license does not restrict the ability of BEST to grant the license set out in this Agreement.

DISCLAIMER OF WARRANTIES. THE WARRANTIES SET FORTH IN THIS SECTION ARE EXCLUSIVE. NEITHER BEST NOR ITS LICENSORS MAKE ANY OTHER WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, BEST AND ITS LICENSORS SPECIFICALLY DISCLAIM ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT OF INTELLECTUAL PROPERTY. EXCEPT AS EXPRESSLY SET FORTH HEREIN, THE SOFTWARE IS PROVIDED AND ACCEPTED STRICTLY "AS IS" AND WITHOUT ANY WARRANTY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY WARRANTY AGAINST LATENT DEFECTS. BEST DOES NOT WARRANT THAT THE SOFTWARE IS EXEMPT FROM ERRORS, THAT ALL ERRORS MAY BE DETECTED OR CORRECTED OR THAT USE OF THE SOFTWARE WILL BE UNINTERRUPTED OR ERROR FREE. BEST GIVES NO WARRANTY THAT THE SOFTWARE WILL MEET THE REQUIREMENTS OF LICENSEE.

## Limited Warranty - DEMO

BEST makes no warranties with respect to (a) Software which is licensed to Licensee as a demo for a limited term or licensed at no cost, or for any services, all of which are provided "as is". BEST does not warrant that the Software will meet your requirements or that operation of the Software will be uninterrupted or error free. You assume responsibility for selecting the Software to achieve your intended results, and for use and results obtained from the Software. You must notify BEST in writing of any nonconformity associated with the Software program within 3 days of its occurrence or contact BEST's customer support team within the same period of time. The failure of Licensee to notify BEST within the time limits identified in this section may constitute Licensee's waiver to have the nonconformity corrected. If, in BEST's sole judgment, the nonconformity is considered to be a BEST responsibility, then BEST's entire liability and Licensee's exclusive remedy shall be modification or replacement of such Software that is non-conforming, provided that Licensee has otherwise complied with this Agreement.

BEST has the right to license the Software. Any portion of the Software in which the intellectual property is owned by someone other than BEST has been licensed to BEST for sub-licensing to you and others. Such license does not restrict the ability of BEST to grant the license set out in this Agreement.

DISCLAIMER OF WARRANTIES. THE WARRANTIES SET FORTH IN THIS SECTION ARE EXCLUSIVE. NEITHER BEST NOR ITS LICENSORS MAKE ANY OTHER WARRANTIES, EXPRESS, IMPLIED OR STATUTORY, BEST AND ITS LICENSORS SPECIFICALLY DISCLAIM ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT OF INTELLECTUAL PROPERTY. THE SOFTWARE IS PROVIDED AND ACCEPTED STRICTLY "AS IS" AND WITHOUT ANY WARRANTY, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY WARRANTY AGAINST LATENT DEFECTS. BEST DOES NOT WARRANT THAT THE SOFTWARE IS EXEMPT FROM ERRORS, THAT ALL ERRORS MAY BE DETECTED OR CORRECTED OR THAT USE OF THE SOFTWARE WILL BE UNINTERRUPTED OR ERROR FREE. BEST GIVES NO WARRANTY THAT THE SOFTWARE WILL MEET THE REQUIREMENTS OF LICENSEE.

# 1 Keystone Web Deployment

THANK YOU FOR PURCHASING KEYSTONE WEB.  
SCALABLE, STREAMLINED, SIMPLE, KEY MANAGEMENT.

This deployment guide provides the step-by-step deployment procedure for the installation of Keystone Web software.

## Keystone Web Deployment Overview

Keystone Web software comprises three components: Keystone Web application, Database, and Scheduler. The diagram below provides a logical representation of the software and the communication with BEST Access servers.

**Disclaimer:** Connection with BEST servers is required only during registration process or when there is a problem on the installed system, such as a hard disk crash or database server failure.

## Hardware Requirements

- Minimum system requirement to optimally run Keystone Web:
- 4 GB RAM (8 GB recommended)
  - 20 GB available hard disk space (100 GB recommended)
  - A server install is preferred, but not mandatory

## Software Requirements

Keystone Web requires that the following prerequisites should be available across platforms:

- Windows 7 (32/64 bit), Windows Server 2008 R2/2012 R2 with all latest updates
- Default IIS versions required for various operating systems:
  - IIS 7.5 for Windows 7
  - IIS 7.0 for Windows 2008
  - IIS 8.5 for Windows 2012
- .Net Framework 4.5 (This prerequisite is bundled with Keystone Web Installer)
- SQL Server 2014 Express; SQL Server 2016 Express
- Internet Connection - to complete registration
- Local Administrator permissions are required to begin installation

## Acronyms and Abbreviations

**IIS** - Internet Information Services (IIS, formerly Internet Information Server) is an extensible web server from Microsoft used with the Windows NT family line of operating systems.

**RAM** - Random Access Memory

**HDD** - Hard Disk Drive

**CPU** - Central Processing Unit

**GB** - Gigabytes

**SQL** - Microsoft SQL Server 2014 Express Edition

**DB** - Database

## 2 Supported Platforms and Technology Requirements

	Windows 7	Windows 2010	Windows Server 2008 R2	Windows Server 2012 R2
CPU	Intel® Core™ I5 3320M CPU @ 2.60 GHz	Intel® Core™ I5 3320M CPU @ 2.60 GHz	Intel® Core™ I5 24000 CPU @ 3.10 GHz	Intel® Core™ I5-3470 CPU @ 3.20 GHz
Memory	4 GB	4 GB	4 GB	4 GB
.Net Framework	4.5	4.5	4.5	4.5
SQL Server	SQL Server 2014 Express	SQL Server 2014 Express; SQL Server 2016 Express	SQL Server 2014 Enterprise/Express Edition; SQL Server 2016 Enterprise/Express Edition	SQL Server 2014 Enterprise/Express Edition; SQL Server 2016 Enterprise/Express Edition

Software Name	Version	Description	URL
Microsoft SQL Server	SQL Server 2014 Express	Software to host the application's database	<a href="https://www.microsoft.com/en-in/download/details.aspx?id=42299">https://www.microsoft.com/en-in/download/details.aspx?id=42299</a>

### Supported Platforms

Keystone Web software has been tested on the platforms shown. While it may work on other operating systems than the ones listed, it has not been tested.

### Technology Requirements

Keystone Web software works on top of specific software that is not included with the Keystone Web installer. The software listed in the adjacent table must be downloaded and installed before the installation of Keystone Web.

## 3 Installing Keystone Web Software

### Pre-Installation Validation

Keystone Web software has been tested on operating systems as detailed under Supported Platforms and Technology Requirements section. Please verify if the requirements are met before beginning the installation process.

### Installing SQL Server 2014 Express Edition

This section provides a step-by-step procedure for installing a new instance of Microsoft SQL Server 2014 Express Edition, using the SQL Server setup installation wizard. The SQL Server Installation Center provides a single feature tree for installation of all SQL Server components, so that you do not have to install them individually. In this section, we will show the installation for some of the features available in the SQL Server 2014 Express Edition. You may find that in your version you have some other features available.

#### Step 1: Preparation

Download the SQL Server 2014 Express Edition (64 bit) from the URL below:

<https://www.microsoft.com/en-in/download/details.aspx?id=42299>

Microsoft® SQL Server® 2014 Express

And click on **Download** button.

In the following screen, depending on your system build, select one of the highlighted files. If your system is a 32-bit Windows operating system, then select the 1st file. If your system is a 64-bit Windows operating system, then select the 2nd file. This will download the executable file and when asked, choose 'Save' to save the file to your system.

Once the download is complete, continue with the Step-by-Step installation section below.

#### Step 2: Step-by-Step Installation

1. It is recommended to reboot the machine before beginning with installation of SQL Server. Double click the downloaded file: **SQLSEXP\_x64\_ENU.exe**

When prompted to choose a directory for extracted files, click **OK** to use the default directory, or click the **Browse** button to select a different directory.

The files should have been extracted into a folder as below. Execute the **SETUP.EXE** application file.

2. Upon executing the setup file, the following window appears. Select the option: **New SQL Server stand-alone installation or add features to an existing installation.**

3. In the Microsoft Update window, select the checkbox to use Microsoft Update to check for updates after you finish the installation, and then click **Next**.

4. Select the **I accept the license terms** checkbox to accept the license terms, and click **Next**.

5. The SQL Server installation program checks your machine to make sure it meets the hardware and software requirements for installing the SQL Server. If you get any errors in the results, use the link in the error message to receive more information. If you receive errors in this report, do not move on to the next step until you resolve all the errors. Ensure the prerequisites mentioned for the selected features are installed before continuing.

6. Choose the following Instance Features to install:

- Database Engine Services
- SQL Server Replication (optional)

Once you are done, click **Next** to continue to the Feature Selection window.

7. On the Instance Configuration window, type or leave it as the Named instance. The Instance ID will automatically change accordingly. When you have finished specifying the name and instance ID for the instance SQL server, click **Next** to move on to the Server Configuration window.

8. On Server Configuration window click **Next**.

9. Database Engine Configuration

Select the option **Mixed Mode**, it allows users to connect to an instance of an SQL Server using either Windows authentication or SQL Server authentication.

Specify a password for the SQL Server administrator account (sa) and click on **Next**.

**Note:** The username sa and the password you had entered should be used when trying to access the database server during Keystone Web Installation and data migration from Keystone 600N5 to Keystone Web. Please store this information for future reference.

The screen below gets displayed that shows the progress of installation.

If everything executed, you should get a final report which indicates the successful completion of each installed service. After successful installation, your screen should look like the one below. You may be asked to restart your computer, click **OK** to restart the computer. If no restart is required, click **Close** to close the Setup Wizard.

The installation is complete.

## Installing Keystone Web Software

The below executable is used to deploy the Keystone Web application, create the MS SQL Database and to create Keystone Web Scheduler. Please follow the steps below to get started:

### Step 1: Download Center

When the software is purchased, a link to download Keystone Web software will be sent by email. Clicking this link will open the "Download Center", displaying a list of files that could be downloaded.

When downloading the demo version no email is provided. You can access the download center from [www.bestaccess.com/keystonewebdemo/](http://www.bestaccess.com/keystonewebdemo/)

Pick the highlighted "Keystone Web Installer" and click the "Download" link. This will download the executable file and when asked, choose "Save" to save the file to your system. On the completion of download, the file below will be available in the folder selected earlier. Double click the executable to deploy the Keystone Web software.

### Step 2: Preparation

The screenshot below shows "Keystone Web" preparing the installation.

**Step 3: Pre-install check for SQL Server**

Depending on the type of setup you would be performing, select the appropriate radio button and click "Next" button. If you chose that you are a stand-alone user, in this process the installer would verify if SQL Server is installed on your computer.

If you do not have SQL Server installed, the installer will prompt that SQL Server 2014 was not installed on your system.

**Step 3a:**

You have the option to download SQL Server 2014. Clicking the "No" button will not download the file, and the installation process will be terminated. You will need to execute the installer once again to resume setting up SQL Server.

**Step 3b:**

Clicking the "Yes" button will open the default browser and navigate to the Microsoft site to download the SQL Server 2014 Express Edition, as in the image below. Depending on your system architecture, select one of the highlighted files. If your system is a 32-bit Windows operating system, then select the 1st file. If your system is a 64-bit Windows operating system, then select the 2nd file. Details for installing SQL Server are available in the "Installing SQL Server 2014 Express Edition" section.

**Step 4:**

After downloading and installing the SQL server in step 3, return to the folder where you have saved the Keystone Web installer. Double click the executable to redeploy the Keystone Web software install. Installation of Keystone Web cannot proceed without meeting the pre-requisite to have SQL server 2014 installed on the machine. If you had not saved the installation file earlier, return to the download center and follow steps 1 & 2.

After redeploying the installer you will be routed to the screen shown below. Choose the Database Server name or the IP address where the database should be installed, as shown in the screen and use the SQL Server credentials to access the server. This is the same password that was used while installing SQL Server 2014.

If a local SQL Server Express Edition is installed, the server installation can be selected from the dropdown list, or click on the Browse button. The default database name is displayed in the text box, which may be changed per your organizational policies. Click Next to continue the installation of the Keystone Web Database.

**Step 5: Website & Email Server Details**

Provide the details of your website and the SMTP details to enable email notifications. To continue installing, click Next button.

Note: If SMTP details are not provided, features of Keystone Web that deal with sending emails will not work.

**KeystoneWeb - Install Wizard**

**Website Information**

Website Name: KeystoneWeb

Computer Name: IND-AVS0809-01

Port Number: 8080

Error File Path: C:\Error.txt

Database Backup Path: \\ServerName\DB\_Shared\_Backup

**Do you want to provide your mail server details?**

YES  NO

SMTP Server Name/IP: mail.YourOrg.com

Users Receive Email From: Admin@YourOrg.com

InstallShield

< Back Next > Cancel

### Step 6: Active Directory Details

Provide Active Directory (AD) settings to synchronize Keystone Web with your organization's active directory. If you do not have a requirement for AD, you may continue to the next step by clicking the **Next** button.

Note: If AD details are not provided, features of Keystone Web that deals with searching for People against the AD will not work.

**KeystoneWeb - Install Wizard**

**These settings are used to synchronize Keystone Web software with the Active Directory (AD) settings of your organization. Provide the fields used in your AD.**

**Do you want to configure Active Directory Settings?**

YES  NO

LDAP Connection String: LDAP://ad.YourOrg.com/

Domain: YourOrg

GUID: objectGUID

Email: mail

First Name: givenName

Last Name: sn

Middle Name: middlename

ID: employeeID

Telephone Number: TelephoneNumber

Department: department

Title: title

Containers: OU=domain|OU=YourOrg

**Separate different groups with a | symbol**

InstallShield

< Back Next > Cancel

### Step 7: Select Setup Type

Choose the Complete option to install Keystone Web software, scheduler, and the Keystone Web database, click **Next** to continue. Complete Install:

**KeystoneWeb - Install Wizard**

**Setup Type**

Choose the setup type that best suits your needs.

Please select a setup type.

**Complete**  
All program features will be installed. (Requires the most disk space.)

**Custom**  
Choose which program features you want installed and where they will be installed. Recommended for advanced users.

InstallShield

< Back Next > Cancel

### Step 8: Ready to Install

Click **Install** to proceed with the installation of Keystone Web software, Scheduler and Keystone Web database.

**KeystoneWeb - InstallShield Wizard**

**Ready to Install the Program**

The wizard is ready to begin installation.

Click Install to begin the installation.

If you want to review or change any of your installation settings, click Back. Click Cancel to exit the wizard.

InstallShield

< Back **Install** Cancel

### Step 9: Installing Keystone Web

**KeystoneWeb - Install Wizard**

**Installing KeystoneWeb**

The program features you selected are being installed.

Please wait while the InstallShield Wizard installs KeystoneWeb. This may take several minutes.

Status:

Progress bar

InstallShield

< Back Next > **Cancel**

### Step 10: Installation Summary

The screen below displays a summary of the installation and the URL to browse the application. Save this path in a safe location to open Keystone Web in the future. Click **Finish** button to complete the installation.

### Step 11: Launch Application

Clicking the Finish button will close the installer. On the desktop, you should be able to see an icon created as below, which when clicked will open your default browser and open the application.

## Custom Installation of Keystone Web Software

### Installing Keystone Web Without Database

In the case of a hard disk crash on the machine hosting the Keystone Web software, and if only the Keystone Web software is to be reinstalled without the database, follow the steps below:

**Perform Steps: 1-6** from **Installing Keystone Web Software** section before continuing.

When you get to the installation screen, select **Custom** and click **Next**.

Click on **Database** from the screen below and select 'This feature will not be available'. This will ensure the database does not get installed.

Proceed through steps 8-11 as mentioned in the Installing Keystone Web Software section to complete the installation.

## Installing Only Keystone Web Database

If the server hosting the database has crashed and only the database needs to be reinstalled, follow the steps below:

**Perform Steps: 1-6** from **Installing Keystone Web Software** section. Along with the above steps, the three additional screens below will help guide you through the custom installation process for keystone web database.

When you get to the installation screen below, select **Custom** and click **Next**.

Click **Install** and proceed with steps 8-11 as mentioned in the **Installing Keystone Web Software** section to complete the installation.

## 4 Changing Configuration Settings

### Configuration Settings for Keystone Web Application

To manually configure the settings for Keystone Web, make changes to the configuration file available in the path below:

- Go to **Start** → **Run** → **INETMGR** and press **Enter**.
- Expand the nodes of IIS as shown below and right-click on **KeystoneWeb**. Then select **Explore** to open the folder containing the configuration file.

This opens the folder where the application is installed. Look for the file **'Web.config'** as seen in the image below and edit it using a text editor such as notepad.

The embedded document contains the settings that need to be modified in the **'Web.config'** file.

### Configuration Settings for Keystone Web Scheduler

Keystone Web Configuration settings and Scheduler Configuration settings should be in sync. Follow the steps below to change the Scheduler Configuration settings.

To open services console and modify the Scheduler Config file settings, go to **Start** → **Run** → **Type 'Services.msc'** and press **Enter**.

## Select Keystone Web Service

Click on the highlighted service below, right-click and select Properties.

## Locate Scheduler Path

Copy the complete physical path (without the file name: NxGenKeystone.WindowsService.exe) to change the keys in the config file

## Open Configuration File

Open Windows Explorer and paste the path into the address bar and press Enter. As highlighted below, select the NxGenKeystone.WindowsService.exe.config file and open using a text editor such as Notepad.

## Changing Values in the Configuration File

Please change the highlighted key values as mentioned in the below document.

## 5 Testing the Installation

### Testing the Installation

Follow any of the options below to test the Keystone Web software installation and verify if all your required system resources are available:

- Use the Keystone Web shortcut created during installation, located on the desktop. Note: this shortcut should be forwarded to all Keystone Web users.

- Save the URL mentioned below for future reference. Click **Finish** to complete the installation.

- If you already know the host name of the server where Keystone Web has been installed, enter the website URL in your browser: `http:// {WebServerName:Port#}`

This is same URL presented to you in the final installation screen (shown above) of Keystone Web. You can also access the URL by double clicking the Keystone Web shortcut created during installation. Once your Keystone Web Software is installed properly, you will be presented with a Registration Screen.

## 6 Uninstalling Keystone Web Software

### Uninstalling Keystone Web Software

If for any reason a need arises to uninstall Keystone Web software, it may be uninstalled at any time. Note that if you must reinstall the software on the same system or another system, you must contact the Keystone Support team for a new License Key because the old license key will be voided.

Using one of the methods below, you may uninstall Keystone Web software. Note that you need to have Administrative permissions on the local system.

### Uninstalling Using Keystone Web Software Installer

Run the **KeystoneWeb.exe** file that was downloaded from the Download Center.

The screen below shows the options available to modify, repair, or remove the program. Select the radio button for the option you require and press **Next**.

Upon successfully removing Keystone Web software, the installer closes automatically.

Once all the components related to Keystone Web software are uninstalled, the 'Uninstaller' closes automatically.

## Uninstalling Using Programs and Features

Go to Control Panel → All Control Panel Items → Programs and Features → Uninstall or change a program.

Select **Keystone Web** from the list and click **Uninstall**.

The screens below will be displayed in succession.

Select **OK** in the below confirmation message box.

## 7 Frequently Asked Questions

### FAQ's

Q - Can I install Keystone Web software without administrative permissions?

A - No, the installer requires you to have admin privileges on the local system on which the Keystone Web software is to be installed.

Q - Can I install Keystone Web software without IIS on my machine?

A - No, IIS is a prerequisite that needs to be installed prior to installing Keystone Web software. If you belong to an enterprise setup, you may want to verify with your IT team before continuing with this install.

Q - Can I install Keystone Web without Microsoft .NET Framework and SQL Server 2014 Express Edition in my machine?

A - No, Microsoft .NET Framework 4.5, SQL Server 2014 Express Edition, and IIS are the prerequisites that need to be installed prior to installing Keystone Web software. Please follow the instructions provided in the installation steps.

Q - Where can I download the Microsoft .NET Framework 4.5?

A - To install the Microsoft .NET Framework 4.5 follow the link below:  
<https://www.microsoft.com/en-us/download/details.aspx?id=30653>

Q - Where can I download the SQL Server 2014 Express Edition?

A - To install the SQL Server 2014 Express Edition follow the link below:  
<https://www.microsoft.com/en-us/download/details.aspx?id=42299>

Q - How do I install IIS on my machine?

A - Before installing IIS, ensure that you have administrative permissions. The document below explains the steps to install IIS on your system.

IIS Installation Steps

## 8 Troubleshooting

### Troubleshooting

Q - How do I provide administrative permissions to a user?

A - Before providing administrative permissions to a user you should have administrative permissions yourself. The document below explains the steps to provide administrative permissions to a user.

How to Make a User an Administrator on Windows 7

Q - How do I install SQL Server 2014?

A - Refer to Installing SQL Server 2014 Express Edition

## 9 Customer Registration

This section provides step-by-step instructions for the customer registration after the installation of the Keystone Web application.

### Registration Overview

When running the application for the first time, the screen below is displayed, prompting the user to Select License Type.

#### SELECT LICENSE TYPE

- I want to run a Demo version. I have not purchased Keystone Web.  
 I have purchased Keystone Web and I want to run a fully licensed version.

PROCEED

If a license type is not selected, an alert message is displayed requiring the user to select one of the radio buttons - Demo version or Licensed version.

#### SELECT LICENSE TYPE

- I want to run a Demo version. I have not purchased Keystone Web.  
 I have purchased Keystone Web and I want to run a fully licensed version.

Please choose Demo or Licensed Version.

PROCEED

### Registration in Fully Licensed Mode

Select the option for a fully licensed version and click **Proceed**.

#### SELECT LICENSE TYPE

- I want to run a Demo version. I have not purchased Keystone Web.  
 I have purchased Keystone Web and I want to run a fully licensed version.

PROCEED

The user is directed to the Licensed Customer Registration page as shown below.

Note: Once the license is purchased, an Order ID will be issued via email to the contact provided in the Purchase Order. Use the order ID information in the email to complete the registration.

#### LICENSED CUSTOMER REGISTRATION

User Name *	Nathan

## Keystone Web | Customer Registration

Note: An internet connection is required to complete the registration process.

The user is required to enter the registration information. Upon checking Agree to Terms and Conditions, the **Register** button is enabled, allowing the user to continue with the registration.

When the user clicks the **Register** button, the following message is displayed on screen:

*Thank you for registering your Keystone Web software. You will receive a license key momentarily by email. Enter the license key to complete your installation and activate the entire suite of Keystone Web features.*

If the registration is completed successfully, an email with the License Activation Key will be sent to the email address that was provided in the registration form.

Enter the License Key that was received from the registration email.

LICENSE ACTIVATION

Thank you for registering your Keystone Web software. You will receive a license key momentarily by email. Enter the license key to complete your installation and activate the entire suite of Keystone Web features.

License Key \*

Click **Activate**. The entered License Key is validated.

LICENSE ACTIVATION CUSTOMER VALIDATION

License Key \*

If the License Key is valid, the user is directed to the Keystone Web Sign In screen, shown below:

Activated Successfully

After entering valid credentials the customer is authenticated as a fully licensed user. Upon successful sign in, the user is directed to the Dashboard screen.

Under the Settings menu, a licensed customer is allowed to see the below additional tiles for Active Directory Integration.

- AD Manual Sync
- AD Sync History
- Email / AD Sync Scheduler

## Registration in Demo Mode

If the Demo version is selected, the user is directed to the Demo Customer Registration page to complete the registration process.

### SELECT LICENSE TYPE

- I want to run a Demo version. I have not purchased Keystone Web.
- I have purchased Keystone Web and I want to run a fully licensed version.

To use the Demo version, the information shown below is required, and the user must agree to the terms and conditions. Once **Agree to Terms & Conditions** is checked, the **Register** button is enabled.

**DEMO CUSTOMER REGISTRATION**

## Convert Demo Version to Licensed Version

To activate a DEMO application to a full working application, please purchase a Keystone Web license. Once the license is purchased, an Order ID will be issued via email to the contact provided in the Purchase Order. Use the order ID information in the email to complete the registration.

To convert the DEMO version to a Licensed version follow these steps:

Go to: **Settings** → **License Activation**

Follow the next steps to enter the Order ID and License Key. Upon clicking, you will be directed to the licensed customer registration form where the Order ID is entered.

## Keystone Web | Customer Registration

Once the Order ID is received, the user can enter it in the licensed customer registration form.

When the user clicks the **Register** button, the following message is displayed on screen:

*Thank you for registering your Keystone Web software. You will receive a license key momentarily by email. Enter the license key to complete your installation and activate the entire suite of Keystone Web features.*

A confirmation email is sent to the user along with the license key.

In Keystone Web the License Activation screen shown below automatically displays after the Order ID is submitted. If the user has navigated from this screen, simply go to: **Settings > License Activation** to display it again.

### LICENSE ACTIVATION

Thank you for registering your Keystone Web software. You will receive a license key momentarily by email. Enter the license key to complete your installation and activate the entire suite of Keystone Web features.

Activated Successfully

Upon **Sign In**, the user is directed to the Keystone Web's Dashboard. The User Name is shown in the top left portion of the screen. 'DEMO' will no longer be displayed at the top of the screen, indicating the

## Demo Expired

When the application is initially registered in the "DEMO" mode, the software will be available for trial for a period of 90 days. If the software was not activated within the 90 day trial period, the software will expire. The software gets locked and will not allow any further usage until the license is activated.

Whenever the URL is accessed on the browser, the screen redirects to the Registration screen, where the previously entered data is available. An Order ID is required to proceed and complete the registration process. An order ID can be received by contacting and purchasing the keystone web software from an approved distributor. Upon receiving an Order ID, it needs to be entered in the registration screen. Follow the steps mentioned in "convert demo to licensed

version section” to complete the registration process and activate the software.

## Hard Disk Crash

If the hard disk of the machine hosting the application or the database has crashed, the user is redirected to the customer validation form.

**CUSTOMER VALIDATION**

It appears that you have previously installed Keystone Web. Please enter the email address that you used during the previous registration and get in touch with Keystone Support team for a new License Key.

If you need assistance, contact Keystone Support at: [keystone.us.support@dormakaba.com](mailto:keystone.us.support@dormakaba.com)

## Moving Software from Test Environment to Production Environment

In cases where the user may have installed the application on a test environment and after successfully testing, decides to move to production, the user should reach out to the Keystone Web support team for assistance.

## Registration Process Flow Chart

## 10 Data Migration Using Migration Tool

This manual provides step-by-step instructions to migrate data from KS600N5 to Keystone Web.

### Required Environment (Source)

To migrate data from KS600N5 to Keystone Web, the user should have the following:

- The existing KS600N5 application should be installed

**Note:** To install the Data Migration tool the user should have administrative permissions on the RDM Server. The user should install the migration tool in a location where Keystone 600N5 is installed.

### Preliminary Considerations

#### Before you begin the data migration:

The following prerequisites are necessary to perform the data migration.

- The Keystone Web application should be installed
- The Keystone Web Database should be created on any SQL server with default master data that is available along with the installation of the Keystone Web executable.
- The KS600N5 application should NOT be running. It should be closed before starting the data migration tool.

**Customers will only be able to migrate data to Keystone Web from Keystone 600N v5.01.** For older versions, please contact keystone web support at 1-800-392-5209.

**Note:** Only versions v3.42. to v5.00 are eligible for upgrade and must be converted to v5.01 before upgrade is possible. This conversion will be no additional charge.

### Data Migration Using Migration Tool

When the software is purchased, the Migration Tool will be available on Download Center or bundled into a Compact Disk that has this tool included with the Keystone Web Installer.

#### Step 1:

Download the data migration tool and unzip the file. The files below will be available in the extracted folder. Click on the **setup** file below to open the Data Migration tool.

#### Step 2:

Once the **setup** file is selected, a window opens to select the Database server. The user provides the required credentials to connect to the SQL server and choose the **Keystone Web** database for Data Migration as shown in the screenshot below.

**Step 3:**

Note that the Keystone Web database is already installed and it needs to be selected. Then click the **Connect** button.

**Step 4:**

The window below provides a list of existing Facilities (Locations) available in the KS600N5 database. Choose the required Facilities (Locations) to migrate from KS600N5 to the new Keystone Web database. Then click the **Migrate to SQL** button as shown in the screen below.

**Step 5:**

The time required for migration depends on the amount of data to migrate. Once the migration is successful you will receive a success message as shown in the screen below.

**Step 6:**

Once the data migration is completed, please verify the migrated data in the Keystone Web application.

**Step 7:**

When the user accesses the Keystone Web application for the first time after the data migration, they will be prompted to reset the password and forced to update the new email address as shown in the screen below.

Once the user has updated the above fields successfully and saved the information, they will need to Sign In to the Keystone Web application using the new password.

**Note: A copy of the original data is migrated to Keystone Web. The data in Keystone 600N5 installation remains intact.**
